Ovidio Escalante Primary Examiner Art Unit: 2614 Continuation of 3. NOTE: The newly added limitation of having the user message "recorded" in response to the alert as now cited in claims 1 and 16 raises new issues since this limitation was not considered before.

Continuation of 11. does NOT place the application in condition for allowance because: Regarding claim 10, Applicant contends that Milewski does not make use of the telephone network for customized messages. The Examiner respectfully disagrees. Milewski teaches that the messages are transmitted across a non-dedicated network 120. The Examiner notes that while this appears to be separate from the PSTN 130, Milewski teaches that an example of a non-dedicated medium is the PSTN, therefore, since Milewski teaches that the ISN 120 is a non-dedicated network and since Milewski defines non-dedicated networks as also including PSTN, then Milewski meets the claimed limitation of transmitted customized messages over a telephony network.
